WARRANTY DOCUMENT GUIDE

By completing the registration checklist below, K-Tec Earthmovers Inc. ("K-Tec") Standard warranty which is twelve (12) months from the date of shipment from the factory or two thousand (2,000) machine hours, whichever comes first, will be replaced by a Extended limited warranty, which is thirty-six (36) months from the in-service date specified on the Extended limited warranty Registration Form or six thousand (6,000) machine hours, whichever comes first. Other than the period of coverage, the same terms and conditions of the Standard Warranty shall apply to the Extended limited warranty, as outlined in the K-Tec Scraper Warranty Policy.

To register a K-Tec Scraper for the Extended limited warranty, the documents listed on the registration checklist below must be submitted to a K-Tec Certified Dealer or direct to K-Tec within thirty (30) days of purchase. If the registration and supporting documents are not received, the Standard Warranty shall apply and the limited structural warranty period shall commence on the date the K-Tec Scraper is shipped by K-Tec and terminate twelve (12) months therefrom.

Demonstration and Rental K-Tec Scrapers: In order for a K-Tec Scraper that is used as a demonstration or rental unit to qualify for the Extended limited warranty, the K-Tec Certified Dealer must submit the Extended limited warranty Registration Form and PDI & In Service Warranty Form within thirty (30) days of the date on which the K-Tec Scraper was first utilized as a demonstration or rental unit. The in-service date specified on the Extended limited warranty Registration Form must be indicated as the date on which the K-Tec Scraper was first used as a demonstration or rental unit, and the Extended limited warranty will run from that specified in-service date, notwithstanding any subsequent purchase of a demonstration or rental K-Tec Scraper by a customer.

REGISTRATION CHECKLIST

- ☐ Extended limited warranty Registration Form – Page 3
- ☐ Privacy and CASL Consent Form – Page 4
- ☐ PDI & In Service Warranty Form – Page 5
- ☐ Bill of Sale (OPTIONAL)
- ☐ Submit above documents to K-Tec or a K-Tec Certified Dealer

K-Tec Certified Dealers: Register online using the Dealer Portal at portal.ktec.com

Direct Customers: Register online at ktec.com/warranty-registration or submit scanned documents via email to sales@ktec.com or fax to 1-204-746-2309

Dealer? Scan QR code to login to K-Tec Portal and complete registration online.

Direct Customer? Scan this QR code to fill out this form online.

PRIVACY AND CASL CONSENT

Consent to the Collection, Use, and Disclosure of Customer Information

This consent is to permit K-Tec Earthmovers Inc. ("K-Tec"), the manufacturer of my equipment, to collect my information for the purposes of administering the warranty for the K-Tec products I purchase (including my ongoing eligibility for such warranty), in addition to offering warranty assistance, providing information on current and future products and services, data collection for the purposes of improving K-Tec's products and services, follow-up to any inquiries, general administration of the customer relationship between myself, the K-Tec Certified Dealer (the "Dealer") if applicable, and K-Tec and sending promotional emails of upcoming events in accordance with K-Tec's privacy policy that is available at <https://ktec.com/privacy-policy> ;(collectively, the "Purposes").

This Consent is to permit the following information to be shared to K-Tec either by direct contact or through the Dealer: Company Name, Mailing Address, Shipping Address, Customer Representative Name, Position, Email, and Phone (collectively, the "Customer Information"). Customer Information collected by K-Tec will also include data from the use of my equipment, including location and directional information, and equipment conditions at points in time ("Telematics Data").

Where the Customer Information includes personal information, applicable privacy laws require K-Tec and the Dealer to obtain my consent to the collection, use and disclosure of the Customer Information. As such, this consent form will permit K-Tec to collect the Customer Information. Where the Customer Information includes personal information of my employees, I represent and warrant that I have obtained any and all consents as may be required for K-Tec to collect such Customer Information in accordance with applicable privacy laws.

The Customer Information will be used by K-Tec for the Purposes as set out herein. For greater certainty, Telematics Data will be used by K-Tec for the purposes of administering the warranty for K-Tec products and for the purposes of improving K-Tec's products and services.

Consent to Electronic Communications

K-Tec would also like to send you electronic communications such as e-mails about its products and services including about your existing products and services as well as news, updates, and new offers and opportunities. To comply with the Canadian Anti-Spam Legislation, K-Tec is required to obtain your consent prior to sending you such communications. Please confirm your consent to receiving such communications by checking the box below. You may opt-out of receiving such communications at any time by contacting K-Tec at: Box 257, Rosenort, Manitoba, Canada, R0G 1W0, sales@ktec.com or 204-746-6435. Please note that K-Tec may still send you communications for which they do not require consent.

☐ Please check here to confirm that you consent to receiving communications from K-Tec as described above.

By initialing this consent form, I am consenting to the collection, use and disclosure of the Customer Information as described above. I understand I can find out more about K-Tec's privacy practices by accessing its Privacy Policy at <https://ktec.com/privacy-policy>, by contacting sales@ktec.com or by calling 204-746-6435.

Model No: _____

NOTICE

It is the **DEALER'S** and **OWNER'S** obligation to complete this checklist and return it to K-Tec within 30 days of the in-service date. Failure to do so disqualifies this unit from extending its factory warranty to 3 years.

POST DELIVERY INSPECTION CHECKLIST

GENERAL

Verify cleanliness - power wash

Check torque markings around machine (1.A)

Check all safety guards, decals, reflectors, and lights - Refer to parts manual

Touch-up paint chips from shipping chains (2.A)

Cycle each hydraulic function (2.B)

CUTTING EDGE

Check for cracks from transportation (2.C)

HITCHPOLE

Manual in holder tube

Check accumulator nitrogen pre-charge (3.A)

Check to confirm that the hitchpole is securely latched to the hitch

Check hitchpole for hydraulic leaks (3.B)

Check Correct Hydraulic hose couplers are on the correct hydraulic hose assembly (3.C)

Grease knuckle (3.D)

LEFT SIDE

Check all pins and lock bolts (4.A)

Check safety pin & block (4.B)

Check for hydraulic leaks (4.C)

REAR

Check axle block bolts (5.A)

Check safety lights (5.B)

Check for hydraulic leaks (5.C)

Check all pins and lock bolts (6.A)

Check ejector rollers/slider blocks (6.B)

RIGHT SIDE

Check all pins and lock bolts (7.A)

Check safety pin & block (7.B)

Check for hydraulic leaks (7.C)

SCRAPER TIRES

Check Left Tire PSI (6.C)

Check Left Center Tire PSI (6.C)

Check Right Center Tire PSI (6.C)

Check Right Tire PSI (6.C)

5/8	5	73	99.0

1.B. CONT. TORQUE MARKINGS

Look for the purple torque mark point to see if anything has shifted out of place. If the torque lines do not line up, re-torque the bolt to the appropriate chart specifications.

2.A. TOUCH UP PAINT CHIPS

The areas circled in red are common spots to check for paint chips from shipping chains and transportation. Use K-Tec construction yellow spray paint to touch up bare metal areas.

2.B. CYCLE EACH FUNCTION

During each function, hold controls to build maximum pressure for 3 seconds, then release to remove any air. Cycle each hydraulic cylinder function to verify correct operation; as shown on the Joystick operators label.

1. Gate - Open / Close
2. Ejector - Extend / Retract
3. Lift - Raise / Lower

2.C. CHECK CUTTING EDGE

Check for paint chips or cracks on the cutting edge that may have occurred during transportation. Use K-Tec construction yellow spray paint to touch up bare metal areas. Alert K-Tec immediately if cutting edge is cracked for a replacement blade to be installed.

3.A. ACCUMULATOR PSI

Recommended Nitrogen Pre-Charge Pressure	
Model	Accumulator 1
1228SGN	1450 PSI
1233SGN	1650 PSI

3.B. HYDRAULIC LEAKS

The areas circled in red are common spots to check for hydraulic oil leaks. Tighten fittings if necessary.

3.C. HYDRAULIC HOSE COUPLERS

Check correct hydraulic hose couplers are on the correct hose assembly. All hydraulic couplers remained locked and connected. Tractor should be shut off when connecting / disconnecting couplers. Check cushion ride vent line is tee'd off the correct hose. (2 Yellow zip-ties)

3.D. GREASE KNUCKLE

Grease knuckle points are located in the circled red areas on the knuckle. These are the only daily grease points on the direct mount scraper. Insert grease gun into zerks with 5 pumps on each grease zerk.

4.A. CHECK ALL PINS AND LOCK BOLTS

The areas circled in red are spots to check all pins and lock bolts including the lift cylinder pin located at the front of the scraper. Ensure they are fastened securely.

4.B. CHECK SAFETY PIN & SAFETY BLOCK

Check if the Safety Block (Left) and the Safety Pin (Right) are in their positions shown above.

4.C. CHECK FOR HYDRAULIC LEAKS

The areas circled in red are spots to check for hydraulic leaks on the left lift gate cylinder hoses. Tighten fittings if necessary.

5.A. AXLE BLOCK BOLTS

Inspect axle block bolts on both sides of the scraper remain torqued correctly.

5.B. CHECK SAFETY LIGHTS

The areas circled in red are where safety lights are located. Test all light functions are in working order.

5.C. CHECK FOR HYDRAULIC LEAKS

Check the areas circled in red for hydraulic leaks on the ejector cylinder hoses. Tighten fittings if necessary.

6.A. CHECK PIN & COTTER PIN

Check the pin & cotter pin for the ejector cylinder in the areas circled red. Ensure they are fastened securely.

6.B. CHECK EJECTOR SLIDER BLOCKS

The areas circled in red are where to check the ejector rollers / slider blocks. Ensure they slide forwards and backwards smoothly, without interference and check bolt torque markings.

6.C. CHECK EACH TIRE PSI

Confirm tires are inflated to proper PSI.
For Ideal Scraper performance.
Visit www.ktec.com/tires for specific tire pressure PSI.

7.A. CHECK ALL PINS AND LOCK BOLTS

The areas circled in red are spots to check all pins and lock bolts including the lift cylinder pin located at the front of the scraper. Ensure they are fastened securely.

7.B. CHECK SAFETY PIN & SAFETY BLOCK

Check if the Safety Block (Left) and the Safety Pin (Right) are in their positions shown above.

7.C. CHECK FOR HYDRAULIC LEAKS

The areas circled in red are spots to check for hydraulic leaks on the right lift gate cylinder hoses and ejector cylinder hoses. Tighten fittings if necessary.

WARNING

**CUSHION RIDE
VENT LINE MUST
BE CONNECTED**

**FAILURE TO DO SO WILL
VOID WARRANTY**

CUSHION RIDE OPERATION

AUTOMATIC CUSHION RIDE ACTIVATION

AUTOMATIC CUSHION RIDE ACTIVATION

The Cushion Ride System operates when the piston of the lift cylinders' are sitting between the top port (scraper down) and the middle port (accumulator). The Cushion Ride is automatically activated when the scraper's cutting edge is 4-6 inches or higher off the ground, with optimum cushion ride performance when the scraper's cutting edge is 12 inches off the ground.

CUSHION RIDE VENT LINE

The Cushion Ride Vent Line is the key to the operation of the Cushion Ride System. The vent line is a zero pressure return line that vents the back pressure from the top of the lift cylinder back to the hydraulic tank. This line is to be connected to the case drain port or the hydraulic tank vent port of the power unit. **IF NOT INSTALLED, SCRAPER WARRANTY IS VOID!**

*See reverse side for cushion ride deactivation and correct Automatic Cushion Ride System operating techniques.

CUSHION RIDE OPERATION

AUTOMATIC CUSHION RIDE DEACTIVATION

LIFT CYLINDER RED ZONE

A fail safe system has been added to the lift cylinders. When maximum lift is reached, the cylinder will automatically lower by 1 inch. This is to prevent internal cylinder binding and structural scraper damage, while ensuring that automatic cushion ride is functional during loaded transport. Even with a built in fail safe system, it is not recommended to operate loaded scraper within 4 inches of maximum lift (red zone).

LIFT CYLINDER GREEN ZONE

Automatic Cushion Ride System activates when the lift cylinder enters the green zone. K-Tec recommends to only operate a loaded scraper within the green zone.

LIFT CYLINDER YELLOW ZONE

Automatic Cushion Ride System automatically deactivates when the scraper's cutting edge falls below 4" off the ground. This giving the operator full control of scraper's cutting edge. K-Tec recommends to only operate scraper cutting edge within the yellow zone.

CUSHION RIDE OPERATION DECAL

Included in this package is an extra cushion ride operation warning decal. Please apply this decal to the inside of the power unit that is pulling this K-Tec scraper unit, to serve as a reminder to the operator proper cushion ride operation. **FAILURE TO OPERATE K-TEC'S AUTOMATIC CUSHION RIDE SYSTEM CORRECTLY MAY CAUSE PREMATURE DAMAGE TO LIFT CYLINDERS AND SCRAPER, AND IS STRICTLY PROHIBITED.**
